**Contents:** Chinese formulators leading in tebuconazole innovations (page 1) - Agenda [online](#) (3) - Patent alert service [online](#) (2) - Companies [online](#) (3)

## Developments

### Chinese formulators leading in tebuconazole innovations

Tebuconazole is in the picture. Since the expiration of the original patent nearly thirty patent publications covering novel formulations have been published. Chinese formulators are leading, but East European inventors also contribute to innovations. [SURfaPLUS](#) reviewed the current developments concerning the formulation of this increasingly important generic. The developments are remarkable and therefore the July issue deals with tebuconazole alone.

#### CONTENTS OF THIS 4-PAGE SPECIAL ISSUE

- Trends in patents for tebuconazole formulations
- Patents on the production process of tebuconazole
- A list of the most recent patents including links to the original patent database
- A figure outlining the number of different patents per year in the period 1998-2009.
